

ARTEM MAKOVSKYI

JAVA DEVELOPER | Open to both remote and office work

SUMMARY

Java Developer with strong analytical skills and a background in business operations. Experienced in developing RESTful applications using **Spring Boot**, microservices. Proficient in **JIRA-based project planning**, database design (**Hibernate**, **Liquibase**), **API documentation (Swagger)**, **testing**, and **deployment**.

Prior to software development, successfully managed an **IT hardware sales and wholesale business**. This entrepreneurial experience provided a deep understanding of business needs, process automation, and customer-oriented solutions. Currently seeking new professional opportunities to leverage both software engineering skills and business acumen.

SKILLS

- **Java:** Java 8, Java Core, Collections, Multithreading, OOP, SOLID, MVC, REST
- **Kotlin**
- **Java Spring Framework:** Core, Boot, Web, MVC, Security, AOP
- **DB:** Hibernate, JDBC, MySQL, Liquibase, FlyWay, MongoDB, Mongock
- **Web Development:** HTML, CSS, Jsoup (parsing), JSON, Servlet, JSP, Tomcat, XML
- **Testing:** JUnit, Testcontainers, Mockito, Integration Testing, Selenium (parsing, testing)
- **Build Tools:** Maven, Gradle
- **Version Control:** Git
- **Containerization and Deployment:** Docker, AWS, Railway, Render
- **Integrated Development Environment:** IntelliJ IDEA
- **Operating Systems:** Windows, Linux
- **Algorithms:** Completed 40 katas on CodeWars
- **English:** Intermediate
- **Project Management Tools:** Jira
- **SDLC:** Knowledge of Software Development Life Cycle
- **Methodologies:** Waterfall, Agile concepts (Scrum, Kanban)
- **Payment and Message Integration:** Stripe, Telegram
- **Additional Tools:** Swagger, Mapper, Metro Retro
- **Caching:** Redis
- **Microservices Architecture:**
 - **Spring Cloud:** Config, Eureka, LoadBalancer, Gateway, CircuitBreaker, Zipkin, Sleuth.
 - **Event-Driven:** Spring for Apache Kafka.
 - **Communication Between Services:** WebClient, RestTemplate, OpenFeign.

ACHIEVEMENTS

- Chess Enthusiast
- Passionate Hiker
- Certificate of completion of the course Spring for beginners.
- Certificate of completion of the Java Developer course at Mate Academy.

EXPERIENCE

Java Developer, 03.2023 - Present

Technologies: Spring MVC, Spring Security JWT, Spring Data, Hibernate, H2, Swagger, Telegram, Stripe, Telegram.

Responsibilities:

- Analyzing user requirements
- Developing new features, debugging, and testing software
- Collaborate with team members to address and resolve issues
- Creation of technical documentation and descriptions
- Deployment process. Working with Git and Docker.
- Jira project management system.
- Creating SQL tables based on UI WEB design and FE requirements.

See some of my projects at:

- **Wine Store API.** [GitHub Code](#)

Application for a wine store. Descriptions of wines, ratings, and reviews from users. News and viewing information in telegram.

- **PC Analyzer API.** [GitHub Code](#)

A web-based application that collects data on tests and components. Generates an Excel file with the final results of the performance and prices of computers with detailed data for analysis.

- **Car Sharing API.** [GitHub Code](#)

REST API to rent cars and pay for them with your credit card through Stripe. The system has an alert service via Telegram.

PREVIOUS EXPERIENCE

Owner

LLC "Monolit-A" 2005-2022

Responsibilities:

Sales management of office equipment, large-format equipment, personal computer equipment, service.

Our company worked in a niche where new products got into assembled PCs as quickly as possible. We collected proposals from sellers and component suppliers into a database, based on which we compiled proposals with a weighted price. **We also implemented a database with ratings of performance or ease of use and shared this information on the website** for our customers. Our salespeople had technical knowledge about the compatibility and effective appropriateness of using components for specific tasks. Our customers were organizations that needed to open or expand an office, or private buyers who wanted to build a productive or gaming PC for home. We also maintained the maximum warranty period based on the maximum official warranty of the components.

EDUCATION

- The [Java Developer course at Mate Academy](#)
- CodeWars (40 Kata Completed)
- Udemy: Spring for beginners
- Stepic: Interactive SQL trainer
- Books:
 - Bruce Eckel, "Thinking in Java, 4th Edition",
 - Herbert Schildt, "Java 8. Complete Guide, 9th Edition."
- Taras Shevchenko National University of Kyiv: Accounting and Auditing.
